

Department of Philosophy, Jagiellonian University  
& Copernicus Center, Kraków

Organizers:

Tomasz Placek (Kraków)

Gábor Hofer-Szabó (Budapest)

Joanna Luc (Kraków)

Guido Bacciagaluppi (Utrecht)

Andreas Bartels (Bonn)

Mauro Dorato (Rome)

László E. Szabó (Budapest)

Samuel C. Fletcher (Minnesota)

Balázs Gyenis (Budapest)

Jenann Ismael (Arizona)

Barry Loewer (Rutgers)

Tim Maudlin (New York)

Thomas Müller (Konstanz)

Stephen Mumford (Durham)

Oliver Pooley (Oxford)

Has our physical world an irreducible modal aspect? Are there modal properties, entities or other conceptual tools which are indispensable in understanding physical theories? If so, what kind of modal components constitute the conceptual bases of the different physical theories?

# MODALITY IN PHYSICS

June 11-13, 2018

Department of Philosophy, Jagiellonian University, Grodzka 52, Kraków, Poland
